LOCATE PORT

The SMARTtrek service is assigned to the vehicle listed on your packing slip. To get started, you'll want to find your vehicle's on-board diagnostic (OBD-II) port. It's generally in one of the areas indicated in the image to the right.

Can't find it? Go to
www.aaa.com/SMARTtrek-portfinder
Or, to speak to SMARTtrek support,
call **800-814-4684**.

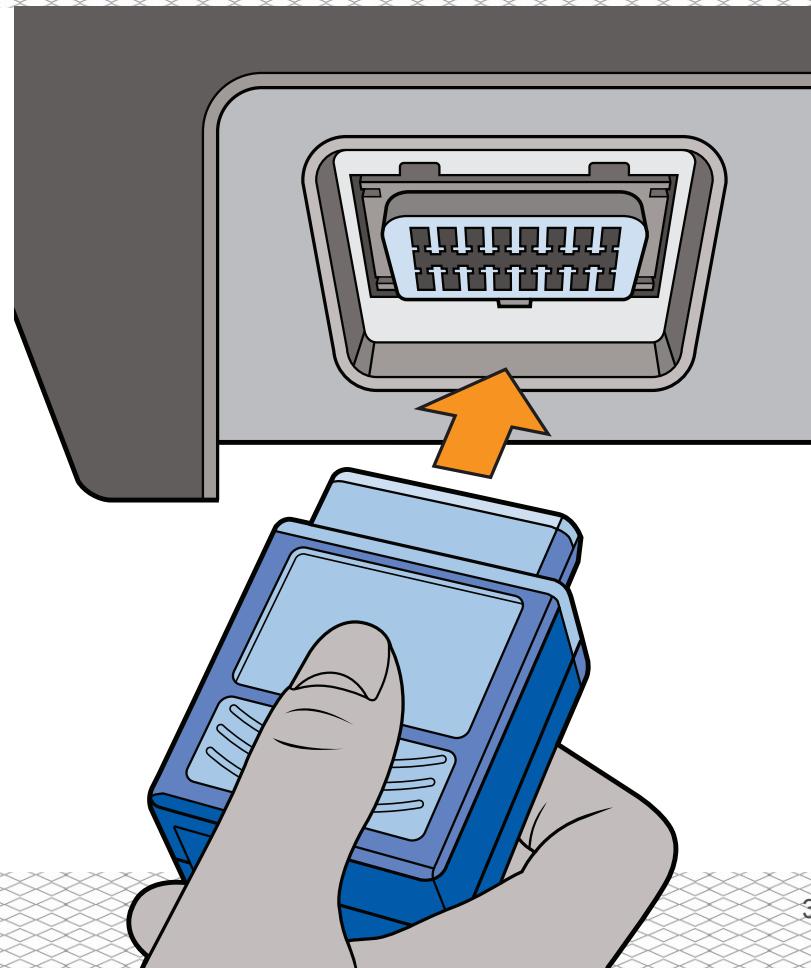

PLUG IN

First, be sure to turn off your ignition and remove the key. If your OBD-II port has a cover, open it all the way before plugging SMARTtrek in.

Look carefully at the shape of the OBD-II port. Note that SMARTtrek only fits one way into the port. You may have to turn SMARTtrek over to correctly line it up with the port.

Next, plug SMARTtrek firmly into the port. Wait a few seconds for the red LED light to flash, confirming a successful connection.

The red blinking light confirms that the device has been inserted properly and that a power connection has been established.

DRIVE CONNECTED

You can now drive as you normally would. If SMARTtrek is visible as you drive, you'll see red, green and orange lights blink on and off, indicating that SMARTtrek is working.

At this point you're ready to receive vehicle health alerts via e-mail and/or SMS text should SMARTtrek find any potential issues. You can rest assured that SMARTtrek will be working in the background to keep you safe on the road.

After initially plugging it in, you can log in to your account at **www.aaa.com/SMARTtrek-home** to see information in the My Vehicle Health section.

However, note that SMARTtrek will take some time to get to know your driving habits. After approximately 120 miles of driving, you'll be able to see information recorded in the My Driving section of the website.

To log on to your SMARTtrek account:

1. Go to **www.aaa.com/SMARTtrek-home**
2. Enter your AAA.com user ID (usually an e-mail address) and password and click "Sign In".

You will be directed to your SMARTtrek account. (Bookmark the site or save in your favorites for easy access in the future.)

Note: If you cannot log-in, please go to www.aaa.com/SMARTtrek-zip and enter your home zip code. Then start at Step 1 again. If you still have questions, contact us at 800-814-4684 or via e-mail at aaahelp@SMARTtrek.com.

Mileage Meter

Miles driven in the past week:	104.467
Average miles per day:	14.924
City driving:	29%
Highway driving:	71%

MILEAGE METER

SMARTtrek can help you learn to drive more efficiently by providing statistics like: total miles driven in the last seven days, average miles driven per day and city/highway driving percentages.

CAR LOCATION

Rest assured that you'll be able to confirm that your car is safe. Clicking on Find My Car shows you the exact location of your car at that moment.

*Note: The Car Location feature is only available where cellular coverage is available.

My Dashboard

Your Car Has No Alerts!

SMARTtrek has not detected any Vehicle Health Alerts. Be sure to check your alert history and information for upcoming recommended services.

The **MY VEHICLE HEALTH** section lets you drill into the detail. Have a vehicle health alert? This section provides more information. Wonder if you have maintenance coming up? Learn more here.

VEHICLE HEALTH ALERT DETAIL

If SMARTtrek has detected a problem, you will find the following information in this section:

- Trouble code name**
- Trouble code number**
- System affected**
- Priority**
- Recommended action**

All this information can easily be printed and taken to an auto repair facility.

Maintenance Reminders

MAINTENANCE REMINDERS

SMARTtrek provides maintenance reminders based on your vehicle's mileage. Be sure to update your mileage in the My Profile section to keep these reminders accurate.

Note that extensive research has been done on the maintenance needed for your vehicle and recommendations may differ from factory recommended maintenance schedules.

Recommendation:

Condition may cause reduced performance and/or drivability. Schedule appointment

ALERT HISTORY

The Alert History section gives you the ability to track alerts that have occurred in the past, making it easier to spot any trends in your vehicle's health.

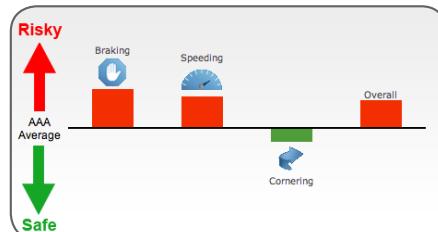

The **MY DRIVING** section helps you learn more about your habits on the road. Use this powerful tool to begin making changes that can help you drive more safely and improve fuel efficiency.

RISKY EVENTS IN THE LAST MONTH

Each page in the My Driving section shows a pane on the left-hand side which contains information on any risky driving events that have taken place in the last month.

These events include aggressive braking events (), speeding events () and cornering events (). Events are listed by date and severity. You can click on any event to see more detail.

DRIVING ANALYSIS

The SMARTtrek Driving Analysis feature shows you how your driving compares to that of other AAA drivers based on an analysis of aggressive braking, accelerating and cornering events.

You can obtain more detail on severe events by clicking on any one of the respective bars. Details include the date/time, location, duration, and more.

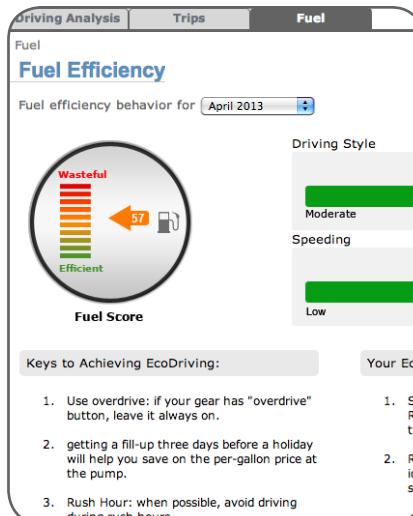

TRIPS AND VIDEO PLAYBACK

SMARTtrek records trip information and organizes it by week/time of day. It is then color-coded according to severity—green is a low-risk trip, yellow is a medium-risk trip and red is a high-risk trip.

Clicking any specific trip (one of the colored squares) will reveal a list of events along a timeline above the Weekly Journal. These include aggressive braking events (⌚), speeding events (🏎️) and cornering events (👉). All events listed are those that took place during that one trip.

Clicking on any of the events along the timeline will pop up a new window wherein you can view a replay of that event on a map. Click the play button in the new window to begin the video replay.

Clicking on the "Show" button will pop up a window in which you can view a video replay of the entire trip.

FUEL

The Fuel Efficiency feature provides you with three different ratings.

SMARTtrek first rates the fuel efficiency of your driving style and speeding on two different rating scales from 1 to 100 (1 being the most fuel efficient). Then SMARTtrek combines the two ratings into an overall Fuel Score.

Note that the ratings and Fuel Score focus on the behavioral aspect of your driving and take into account overall driving patterns during a specific month. Monitoring these ratings and making even small changes to your driving habits can help you drive more efficiently and help lengthen the life of your car.

This feature also includes general eco-driving tips, as well as tips targeted to your driving style.

The **MY PROFILE** section lets you customize your communication preferences. You'll only hear from SMARTtrek when you want to hear from SMARTtrek.

The image shows a smartphone screen displaying the "My Profile" section of the SMARTtrek mobile application. At the top, there is a header bar with a car icon, the text "VOLVO V70", and "138,225.3 Miles". To the right of the header is a "Choose Your Car" button with a dropdown arrow. Below the header, the main title "My Profile" is displayed in large, bold, purple font. Underneath it, the heading "Vehicle Information" is shown in bold black font. The vehicle details listed are "VOLVO V70", "VIN: YV1SZ58D51103XXXXX", and "Odometer: 138,225.3 Miles". The next section, "Vehicle Health Alerts", is also in bold black font. It contains two entries: "Diagnostic" and "Maintenance". Each entry has two options: "Use SMS Text" (set to OFF) and "Use E-mail" (set to ON). At the bottom of the screen, there is a link "Vehicle Health Summary (monthly e-mail) ON".

VEHICLE INFORMATION

In this section you'll be able to confirm your vehicle details as we have them on file:

Odometer – The more accurate the odometer reading you enter, the more accurate your maintenance reminders will be.

*Note that in order to change your VIN (in case you wish to move SMARTtrek to a different vehicle) please contact us at 800-814-4684 or aaahelp@SMARTtrek.com.

VEHICLE HEALTH ALERTS

In this section you'll be able to choose which types of communications you'd like to receive and how (SMS text* or e-mail):

Diagnostic – Alerts that communicate potential problems in your vehicle's health.

Maintenance – Alerts that let you know when upcoming maintenance may be due.

Vehicle Health Summary – A monthly summary reviewing your car's health (e-mail only).

*Note that standard text messaging rates apply.
